**BRIAN SCOTT QUOTES:**

**What are your thoughts on racing at Charlotte Motor Speedway?**

"Of course it is always fun. Everybody loves racing in front of the home town. You get the guys from the shop that might not come to a lot of races. There is an atmosphere which everybody

really wants to win because you get to celebrate with so many of your guys and so many people that are helping build race cars. It's always a race track that families like to come to if you are not from the area. My family from Idaho always comes in to town. There seems to always be a lot of added pressure and a desire to perform well in front of so many people."

**Is there anything that you can learn from the Nationwide race that might carry over to your Sprint Cup Series race?** "I love it when I do double duty because I feel like I do learn from the Nationwide Series. I feel like I learn on the tires and the lines and the grooves of the race track. Even little driving tendencies that you can do especially at a place where the tires wear out on how to save tires and be good on the long run. Normally, it's balance type things on how you start off and fire off on a restart, to how you are going to be on the long run. I think running a Nationwide race, and the Cup guys that run Nationwide races, then going to the Cup race is a huge benefit."
